

PROJECT PROFILE

Six Months to Deploy a Resilient and Robust Animal Health PV Solution

Ennov assisted a valued Animal Health customer of almost 20 years in moving PV operations from a local installation to a new SaaS cloud environment. The result: An extremely smooth transition with deployment of the complete end-to-end pharmacovigilance suite, completed in under 6 months. At Ennov we pride ourselves on building long and effective partnerships with our customers.

Company Profile

- Industry: Animal Health
- Specialty: Medicine and Vaccine Production
- Employees: >10,000

Project Driver

- Required a reduced reliance on IT infrastructure
- Expressed need for simplified license management

Deployment

- Extremely smooth transition considering the complexity of the project
- Solution for signal detection, signal management, case intake, reporting, and triage
- Deployment was completed in under 6 months

"We were happy to find the support and respect Ennov demonstrated, which we felt was quite rare in a shared business partnership."
